7. Metodología y volumen de trabajo del estudiante

Descripción

This course is part of the ULL Educational Innovation Projects program (with continuity since 2016-17) and of the FINULL pilot program (since 2020-21) with 40% of its teaching being carried out and evaluated in English.

Practical lessons in banking and finance are developed with a collaborative learning methodology, in English and based on the pillars of project-based learning and the CLIL model (which promotes the learning of content and the communicative use of English). A series of activities connected to the current banking management are proposed. These involve the collaborative participation of students, who must carry out part of autonomous work and teamwork with the guidance of the professor. Together, the use of new technologies and collaborating tools is promoted, as well as the use of different communication channels, with an emphasis on audiovisuals.

In the theoretical-practical lessons, it is used the case study methodology, combined with some flipped-class sessions and certain gamification techniques. The contents are focused on the analysis of the activity of credit institutions, in order to understand the banking system as a whole. It is included the study of real cases and debates on the banking system as a sector fully exposed to dynamic changes.

The development of the study plan will be carried out according to the training activities and contact hours specified in the following table. The student's total workload is 150 hours.

9. Sistema de evaluación y calificación

Descripción

CONTINUOUS ASSESSMENT:

In the continuous assessment modality, the final grade for the course is the sum of the grades of the following blocks:

1. Project work in English ('project-based learning'): 40% of the grade corresponds to this block, with a maximum score of 4 points. It consists of individual tasks and teamwork tasks (with all the contents in English).
2. Objective tests: 50% of the grade corresponds to this block with a maximum of 5 points. It consists of answering theoretical and practical questions (short answer, test and development type) formulated in:
 - An online questionnaire for a total of 2 points, carried out throughout the semester.
 - An exam for a total of 3 points, on the date of official announcement.
3. Debate: 10% of the grade is evaluated through the individual participation in a debate, with a maximum score of 1 point.

A minimum final grade of 5 points is required to pass the course.

Carrying out one of the activities proposed in block 1 and/or one of the objective test implies choosing the continuous assessment option for the whole academic year.

Minimum requirements to access the continuous assessment are: Participation in 70% of the classes and publishing an identifying photo in the virtual classroom.

Continuous assessment is maintained for all ordinary calls throughout the academic year.

SINGLE EVALUATION:

For all the calls of the academic year, the single evaluation system may be applied, which consists on taking a single exam, with a maximum score of up to 10 points, and based on the written resolution of questions of theoretical and practical content of everything taught in the subject, and requiring a minimum of 5 points to pass.

STUDENTS IN 5TH, 6TH AND 7TH EXTRAORDINARY CALL: by default, students in the 5th, 6th or 7th extraordinary call, only have the right to be examined by a University Court (with a single evaluation of 10 points). If the student wants to opt for the continuous evaluation and be qualified by the professor, he/she will have to submit a resignation document to the University Court for each call through the Electronic Office, as established by the ULL Evaluation and Qualification Regulations and with the anticipation established by the Calendar ULL Grade.
